

Catholic Identity Standards

2.0 The student understands and integrates the content of what is learned into their faith and daily life.

- 2.0A recognize that every human life is sacred because each person is created and loved by God
- 2.0B describe ways to take part in/be responsible to the community by discerning and using our God-given gifts
- 2.0C recognize and oppose unjust social structures and work toward justice for all
- 2.0D see God at work in all things and as expressed in the sacraments
- 2.0E connect scripture, tradition, and the models of Mary and the saints to guide, grow, and deepen faith

Mathematical Process Standards

2.1 The student uses mathematical processes to acquire and demonstrate mathematical understanding.

- 2.1A apply mathematics to problems arising in everyday life, society, and the workplace
- 2.1B use a problem-solving model that incorporates analyzing given information, formulating a plan or strategy, determining a solution, justifying the solution, and evaluating the problem-solving process and the reasonableness of the solution
- 2.1C select tools, including real objects, manipulatives, paper and pencil, and technology as appropriate, and techniques, including mental math, estimation, and number sense as appropriate, to solve problems
- 2.1D communicate mathematical ideas, reasoning, and their implications using multiple representations, including symbols, diagrams, graphs, and language as appropriate
- 2.1E create and use representations to organize, record, and communicate mathematical ideas
- 2.1F analyze mathematical relationships to connect and communicate mathematical ideas
- 2.1G display, explain, and justify mathematical ideas and arguments using precise mathematical language in written or oral communication
- 2.GS2* develop lines of inquiry (as developmentally appropriate) to understand why things are true and why they are false
- 2.GS3* recognize the power of the human mind as both a gift from God and a reflection of Him in whose image and likeness we are made
- 2.GS4* survey the truths about mathematical objects that are interesting in their own right and independent of human opinions
- 2.DS1* display a sense of wonder about mathematical relationships as well as confidence in mathematical certitude
- 2.DS2* respond to the beauty, harmony, proportion, radiance, and wholeness present in mathematics
- 2.DS3* show interest in the pursuit of understanding for its own sake
- 2.DS4* exhibit joy at solving difficult mathematical problems and operations

Number and Operations

2.2 The student applies mathematical process standards to understand how to represent and compare whole numbers, the relative position and magnitude of whole numbers, and relationships within the numeration system related to place value.

- 2.2A use concrete and pictorial models to compose and decompose numbers up to 1,200 in more than one way as a sum of so many thousands, hundreds, tens, and ones
- 2.2B use standard, word, and expanded forms to represent numbers up to 1,200
- 2.2C generate a number that is greater than or less than a given whole number up to 1,200
- 2.2D use place value to compare and order whole numbers up to 1,200 using comparative language, numbers, and symbols ($>$, $<$, or $=$)
- 2.2E locate the position of a given whole number on an open number line
- 2.2F name the whole number that corresponds to a specific point on a number line

Number and Operations

2.3 The student applies mathematical process standards to recognize and represent fractional units and communicates how they are used to name parts of a whole.

- 2.3A partition objects into equal parts and name the parts, including halves, fourths, and eighths, using words
- 2.3B explain that the more fractional parts used to make a whole, the smaller the part; and the fewer the fractional parts, the larger the part
- 2.3C use concrete models to count fractional parts beyond one whole using words and recognize how many parts it takes to equal one whole
- 2.3D identify examples and non-examples of halves, fourths, and eighths

Number and Operations

2.4 The student applies mathematical process standards to develop and use strategies and methods for whole number computations in order to solve addition and subtraction problems with efficiency and accuracy.

- 2.4A recall basic facts to add and subtract within 20 with automaticity
- 2.4B add up to four two-digit numbers and subtract two-digit numbers using mental strategies and algorithms based on knowledge of place value and properties of operations
- 2.4C solve one-step and multi-step word problems involving addition and subtraction within 1,000 using a variety of strategies based on place value, including algorithms
- 2.4D generate and solve problem situations for a given mathematical number sentence involving addition and subtraction of whole numbers within 1,000

Number and Operations

2.5 The student applies mathematical process standards to determine the value of coins in order to solve monetary transactions.

- 2.5A determine the value of a collection of coins up to one dollar
- 2.5B use the cent symbol, dollar sign, and the decimal point to name the value of a collection of coins

Number and Operations

2.6 The student applies mathematical process standards to connect repeated addition and subtraction to multiplication and division situations that involve equal groupings and shares.

- 2.6A model, create, and describe contextual multiplication situations in which equivalent sets of concrete objects are joined
- 2.6B model, create, and describe contextual division situations in which a set of concrete objects is separated into equivalent sets

Algebraic Reasoning

2.7 The student applies mathematical process standards to identify and apply number patterns within properties of numbers and operations in order to describe relationships.

- 2.7A determine whether a number up to 40 is even or odd using pairings of objects to represent the number
- 2.7B use an understanding of place value to determine the number that is 10 or 100 more or less than a given number up to 1,200
- 2.7C represent and solve addition and subtraction word problems where unknowns may be any one of the terms in the problem

Geometry and Measurement

2.8 The student applies mathematical process standards to analyze attributes of two-dimensional shapes and three-dimensional solids to develop generalizations about their properties.

- 2.8A create two-dimensional shapes based on given attributes, including number of sides and vertices
- 2.8B classify and sort three-dimensional solids, including spheres, cones, cylinders, rectangular prisms (including cubes as special rectangular prisms), and triangular prisms, based on attributes using formal geometric language
- 2.8C classify and sort polygons with 12 or fewer sides according to attributes, including identifying the number of sides and number of vertices
- 2.8D compose two-dimensional shapes and three-dimensional solids with given properties or attributes
- 2.8E decompose two-dimensional shapes such as cutting out a square from a rectangle, dividing a shape in half, or partitioning a rectangle into identical triangles and identify the resulting geometric parts

Geometry and Measurement

2.9 The student applies mathematical process standards to select and use units to describe length, area, and time.

- 2.9A find the length of objects using concrete models for standard units of length
- 2.9B describe the inverse relationship between the size of the unit and the number of units needed to equal the length of an object
- 2.9C represent whole numbers as distances from any given location on a number line
- 2.9D determine the length of an object to the nearest marked unit using rulers, yardsticks, meter sticks, or measuring tapes
- 2.9E determine a solution to a problem involving length, including estimating lengths
- 2.9F use concrete models of square units to find the area of a rectangle by covering it with no gaps or overlaps, counting to find the total number of square units, and describing the measurement using a number and the unit
- 2.9G read and write time to the nearest one-minute increment using analog and digital clocks and distinguish between a.m. and p.m.

Data Analysis

2.10 The student applies mathematical process standards to organize data to make it useful for interpreting information and solving problems.

2.GS1* demonstrate the mental habits of precise, determined, careful, and accurate questioning, inquiry, and reasoning

- 2.10A explain that the length of a bar in a bar graph or the number of pictures in a pictograph represents the number of data points for a given category
- 2.10B organize a collection of data with up to four categories using pictographs and bar graphs with intervals of one or more
- 2.10C write and solve one-step word problems involving addition or subtraction using data represented within pictographs and bar graphs with intervals of one
- 2.10D draw conclusions and make predictions from information in a graph

Personal Financial Literacy

2.11 The student applies mathematical process standards to manage one's financial resources effectively for lifetime financial security.

2.DSS* show interest in how the mental processes evident within the discipline of mathematics (such as order, perseverance, and logical reasoning) help us with the development of the natural virtues (such as self-discipline and fortitude)

- 2.11A calculate how money saved can accumulate into a larger amount over time
- 2.11B explain that saving is an alternative to spending
- 2.11C distinguish between a deposit and a withdrawal
- 2.11D identify examples of borrowing and distinguish between responsible and irresponsible borrowing
- 2.11E identify examples of lending and use concepts of benefits and costs to evaluate lending decisions
- 2.11F differentiate between producers and consumers and calculate the cost to produce a simple item
